

Parent Assessment Manual Software 3.0 TRAINING WORKSHOP

Commissioning an Introductory 2 Day Training Workshop covering the Models, Theories and Skills required to complete a PAMS 3.0 Assessment

This workshop will be delivered at your venue and will provide participants in your organisation with an understanding of the methodology underpinning the PAMS assessment and all of the PAMS tools, and their multiple applications. Also, the workshop will cover how to generate PAMS Reports from the software and how to apply PAMS to the measurement of interventions.

Workshop objectives:

Day 1:

1. To identify the major differences between the PAMS evidence based approach to the assessment of vulnerable families and other assessment approaches.
2. To learn about the theories and working model underpinning the PAMS 3.0 software and how these interface with the Assessing Children in Need Framework and Common Assessment Framework.
3. To be able to use the PAMS 3.0 software in everyday practice and within the context of the courts.

Day 2:

1. To gain confidence in inputting data and using the PAMS 3.0 software.
2. To apply the PAMS 3.0 software to the measurement of interventions.
3. To learn about research that relates to the assessment of parents with learning disabilities.

This Workshop will be of interest to social workers, family support workers, psychologists, health visitors, midwives, barristers, solicitors, children's guardians, family mediators, judges, magistrates, researchers and academics.
